

NAGABHUSHAN TIRTH

Frontend Developer

✉ tirthnagbhushan56@gmail.com [in LinkedIn](#) [GitHub](#) [Portfolio](#)

Summary

Frontend Developer with 1+ year of experience building scalable web and mobile applications using **Next.js, React.js, React Native, Expo, and TypeScript**. Skilled in developing responsive user interfaces, integrating REST/GraphQL APIs, and implementing authentication, real-time features, and modern state management solutions. Passionate about creating clean, performant, and user-focused applications with strong attention to scalability and maintainable architecture.

Skills

Frontend: JavaScript, TypeScript, React.js, Next.js, React Native, Expo, Redux Toolkit, Tailwind, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, GraphQL, Better Auth, JWT Auth, MongoDB, Mongoose, SQL

Developer Tools: Git, GitHub, Docker, Postman, VS Code, MongoDB Compass, NPM/Yarn

Additional Skills: Responsive UI Development, Authentication Systems, State Management, API Integration, Real-time Features (Socket.IO), Cross-Platform Mobile App Development

Experience

Junior Frontend Developer

May 2025 – Present

ShubPy Solutions (Remote)

Next.js, React.js, TypeScript, React Native, Expo, Redux Toolkit, GraphQL, Docker

- Developed and maintained responsive web applications using **Next.js, React.js, and TypeScript** with focus on performance, scalability, and reusable component architecture.
- Built and enhanced cross-platform mobile applications using **React Native and Expo**, delivering consistent user experience across Android and iOS devices.
- Integrated and managed **REST and GraphQL APIs** with Redux Toolkit for efficient state management, real-time updates, and seamless data flow.
- Worked on end-to-end feature development including **authentication, dashboards, forms, API integration, and dynamic UI modules**.
- Collaborated in debugging, code reviews, build optimization, and **Docker-based deployment workflows** to ensure stable production releases.

Projects

studentsync | [link](#) | *Next.js, TypeScript, Tailwind, Redux, REST APIs, Better Auth, MongoDB*

- Built a full-stack RBAC platform (Next.js 16, MongoDB, Better Auth) with 3 user roles, Google/GitHub OAuth, and role-scoped REST APIs.
- Implemented real-time per-event chat rooms using a custom Socket.IO server co-hosted with Next.js, with live typing indicators and message persistence.
- Designed 3 role-specific analytics dashboards using MongoDB aggregation pipelines and Recharts (AreaChart, PieChart, BarChart) for live trend visualization.
- Integrated Cloudinary (CDN image uploads), React-Leaflet (GPS-pinned event maps), and RFC-5545 .ics calendar export with Google Calendar/Outlook deep-links.
- Built an in-app notification system with hybrid DB + virtual (computed) notifications, 60-second polling, mark-as-read, and role-targeted delivery.

devtinder | [link](#) | *JavaScript, React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, HTML, REST APIs*

- Built a MERN stack developer-matching platform with JWT/bcrypt auth, deployed on Vercel with a Node.js/Express REST API.
- Integrated real-time chat using Socket.io with JWT-authenticated WebSocket connections and MongoDB message persistence.
- Designed a connection request system with Mongoose compound indexes, pre-save validation, and status-based state transitions.
- Managed global state with Redux Toolkit (feature slices for feed, connections, requests) and built a responsive UI with Tailwind CSS + DaisyUI.
- Implemented secure file uploads via Multer, CORS whitelisting for multi-origin deployment, and server-side input validation using the validator library.

Awards & Certifications

- **Version Control Certificate – Coursera (2022):** Learned Git and GitHub workflows including branching, commits, pull requests, collaboration, and version management best practices.
- **Crash Course on Python – Coursera (2022):** Gained foundational knowledge of Python programming including data structures, functions, loops, automation basics, and problem-solving concepts.
- **MERN Stack Certificate – Coursera (2025):** Built full-stack web applications using MongoDB, Express.js, React.js, and Node.js with hands-on experience in REST APIs, authentication, and CRUD operations.

Education

SB Patil College of Engineering, Pune

Bachelor of Engineering in Computer Engineering

2021 – 2024

CGPA: 8.00 / 10

VVP Polytechnic, Solapur

Diploma in Computer Engineering

2017 – 2020

Percentage: 86%
